

PRO100 MICRO-MILLING MILL

Single-story installation: equipment

Description :

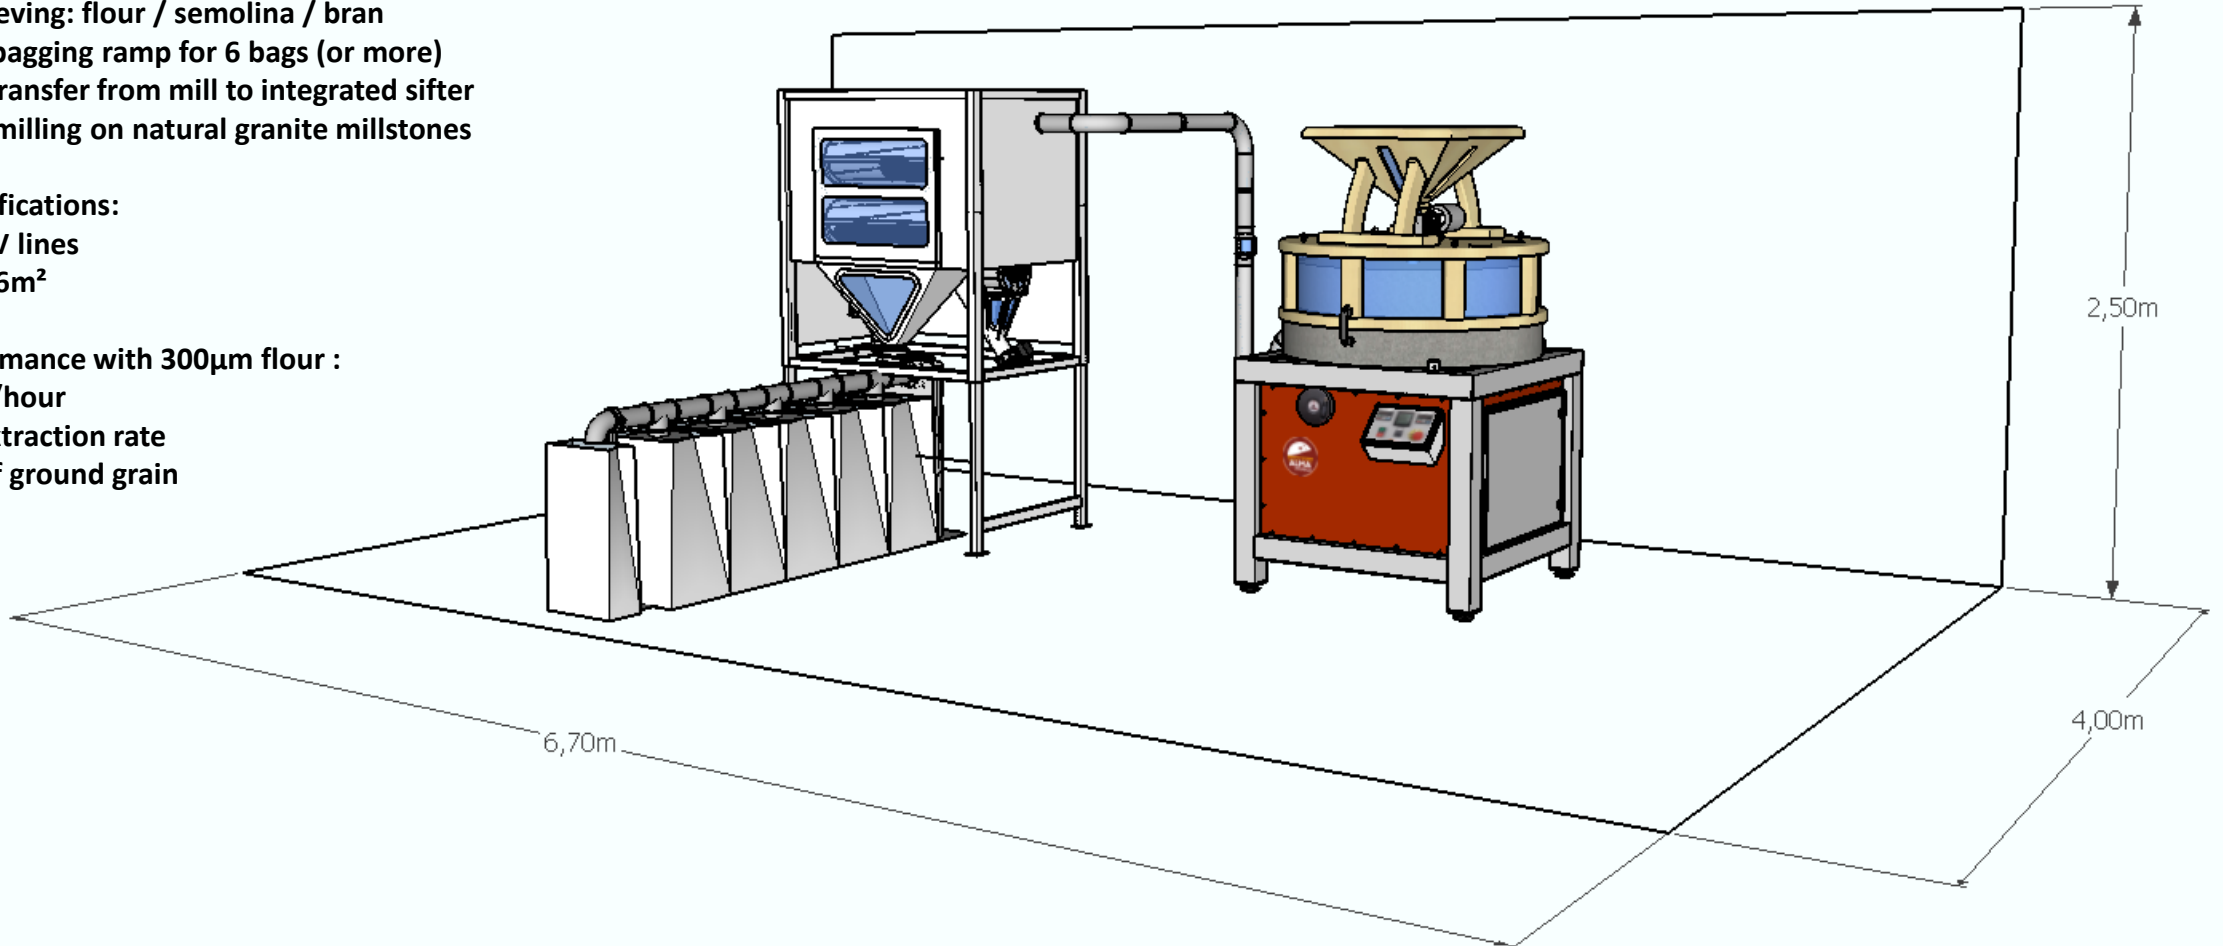

- Investment starting from €48,900 excluding VAT
- Automated: "plug & play" system
- 3-fraction sieving: flour / semolina / bran
- Volumetric bagging ramp for 6 bags (or more)
- Pneumatic transfer from mill to integrated sifter
- Single-pass milling on natural granite millstones

Technical specifications:

- 2 x 16A 400V lines
- Footprint: 26m²

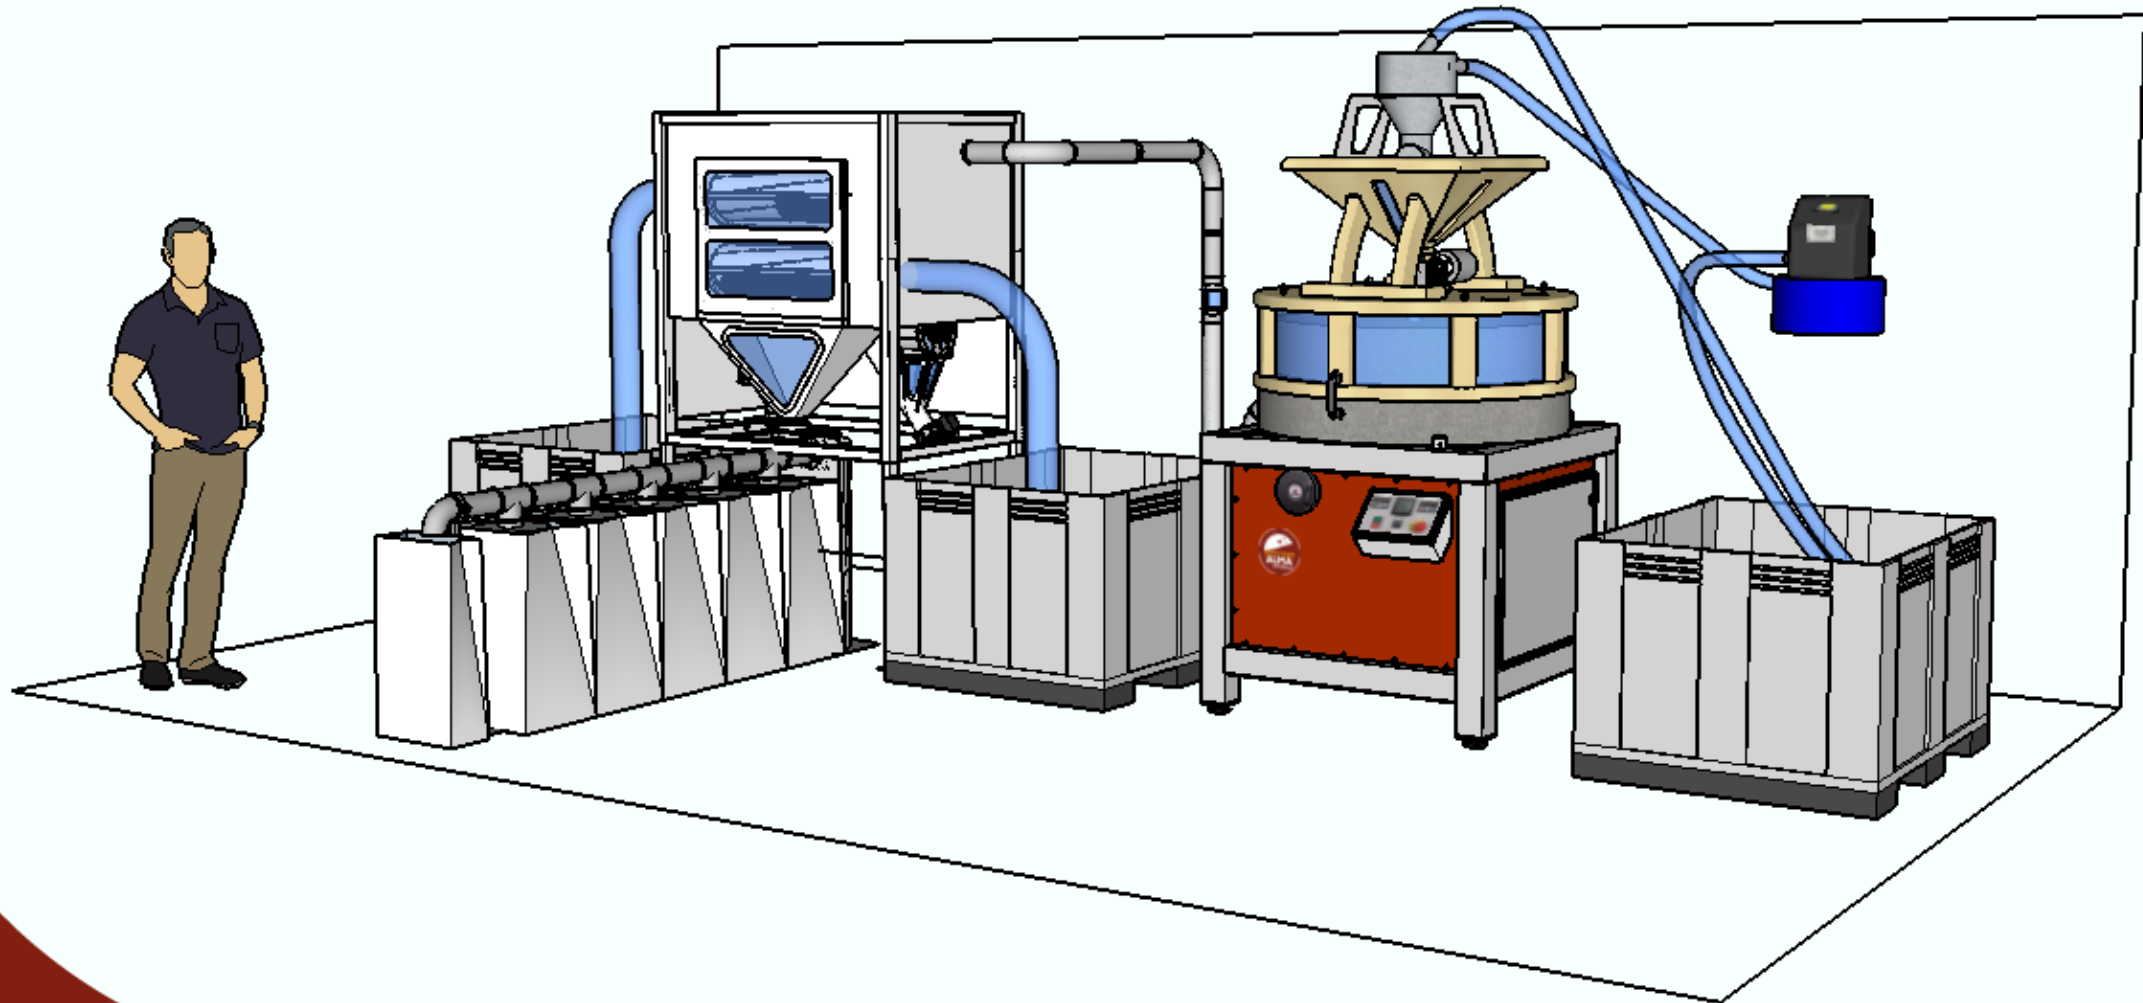

Average performance with 300µm flour :

- Up to 85 kg/hour
- 84% flour extraction rate
- 37 Wh/kg of ground grain

PRO100 MICRO-MILLING MILL

Single-story installation: layout

PRO100 MICRO-MILLING MILL

Installation with sifter upstairs: equipment

Description :

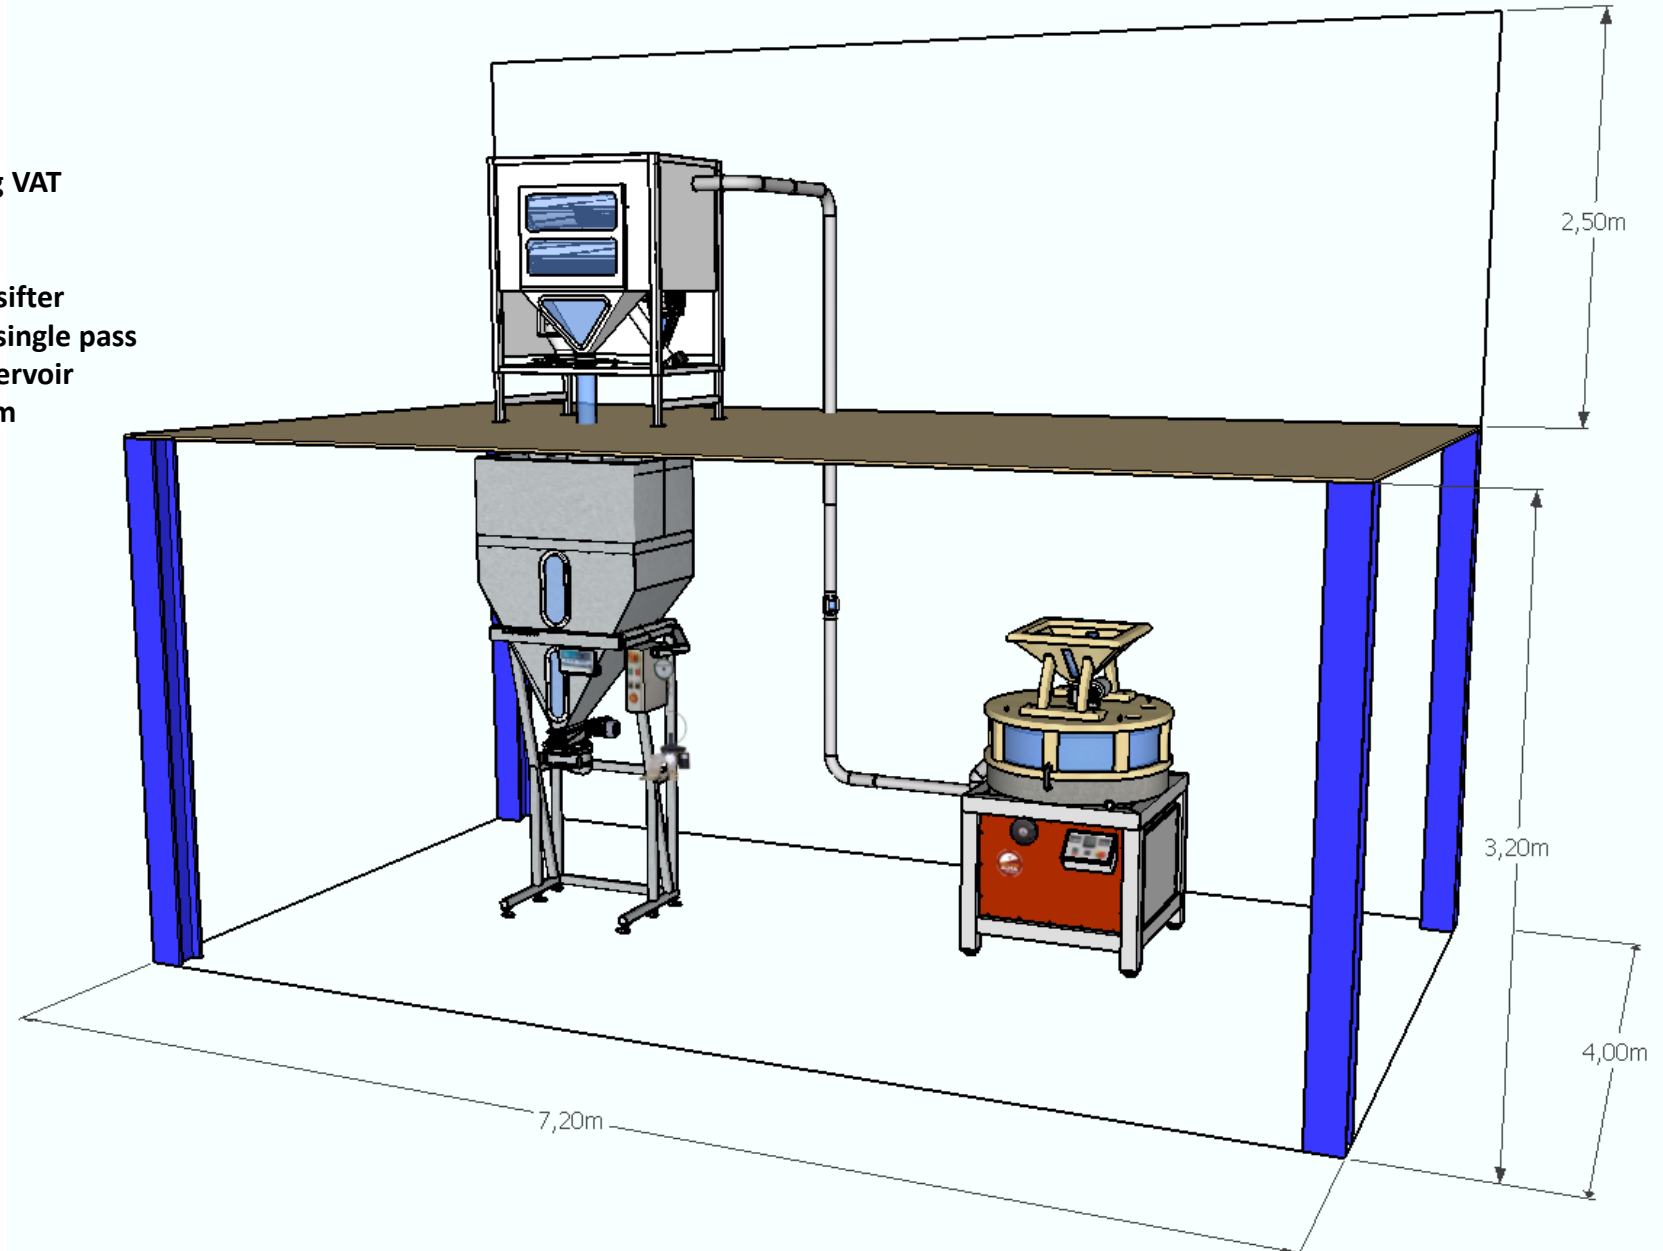

- Investment starting from €68,000 excluding VAT
- Automated: "plug & play" system
- 3-fraction sieving: flour / semolina / bran
- Pneumatic transfer from mill to integrated sifter
- Grinding on natural granite millstones in a single pass
- Capacity: 1000-liter stainless steel flour reservoir
- Ergonomics: Integrated 25kg bagging system

Technical specifications:

- 2 x 16A 400V lines + 2 x 16A 240V lines
- Footprint: 26m² + floor

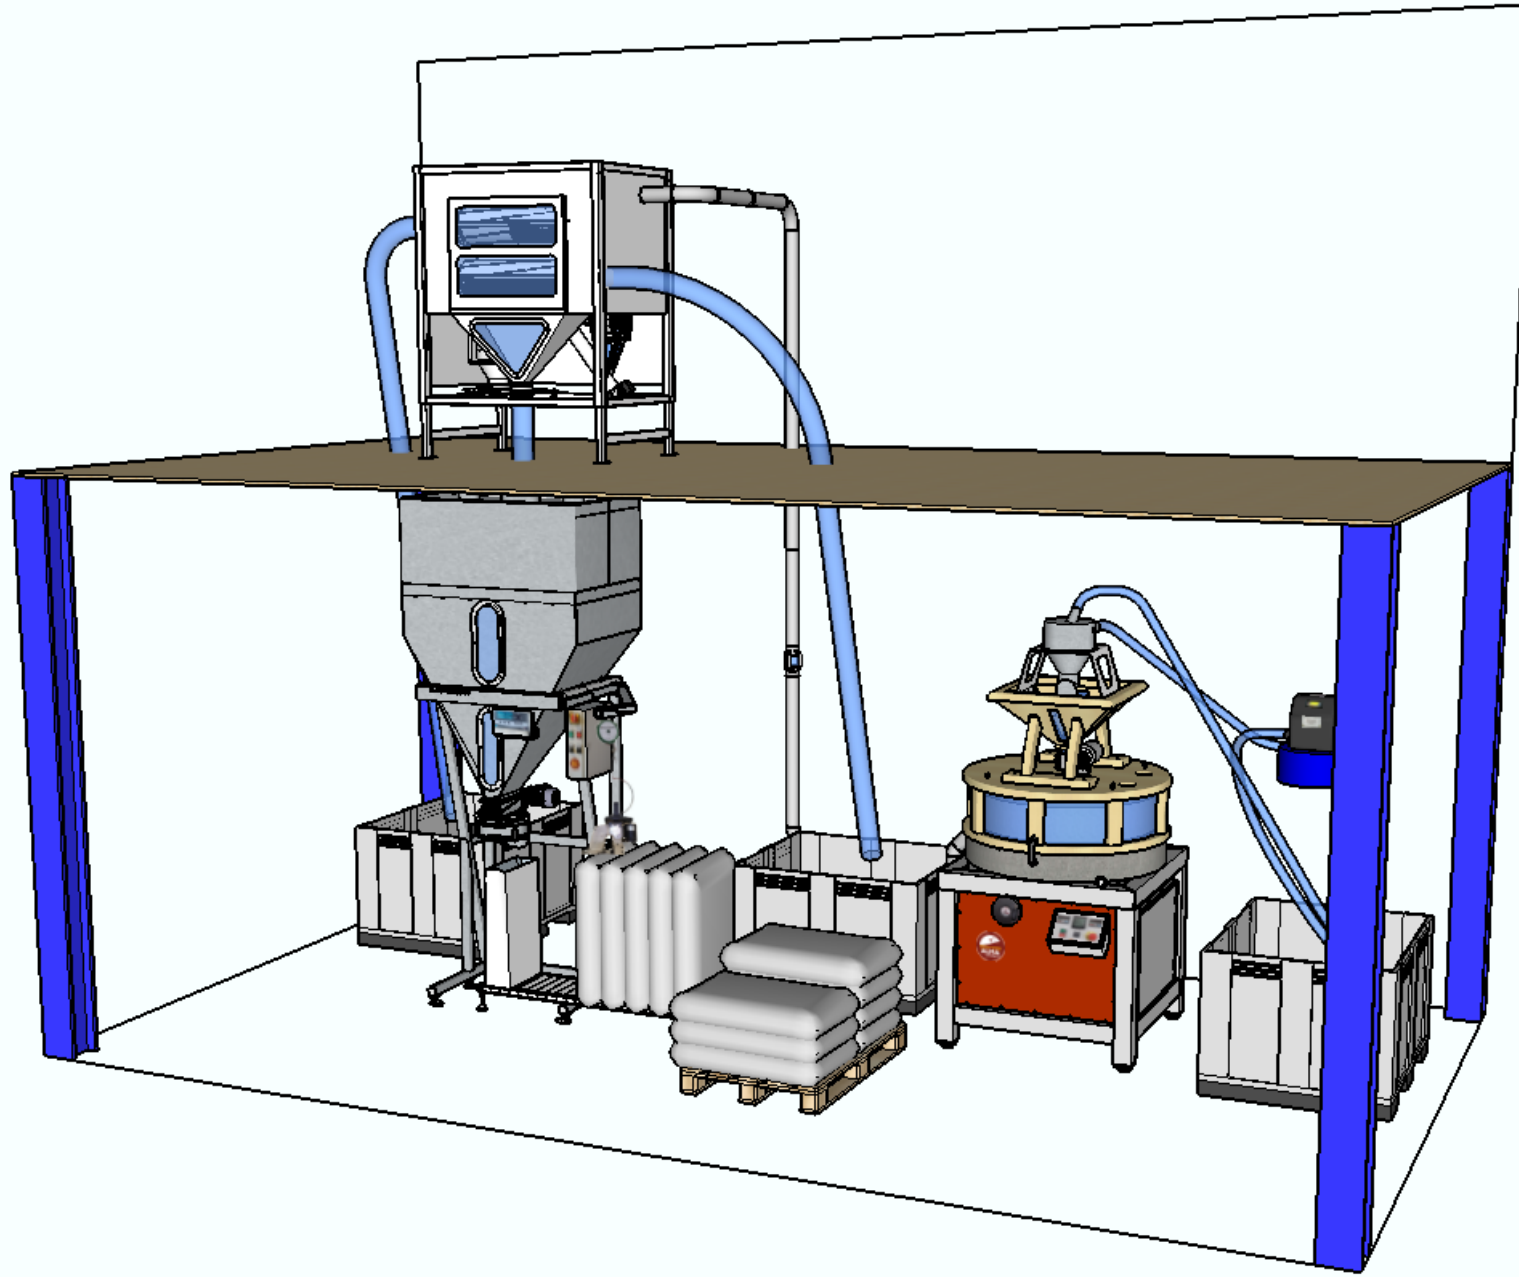

Average performance with 300µm flour :

- Up to 85 kg/hour
- 84% flour extraction rate
- 37 Wh/kg of ground grain

PRO100 MICRO-MILLING MILL

Installation with sifter on the upper floor: layout

MICRO-MILLING 2 x PRO100

Installation with sifter upstairs: equipment

Description :

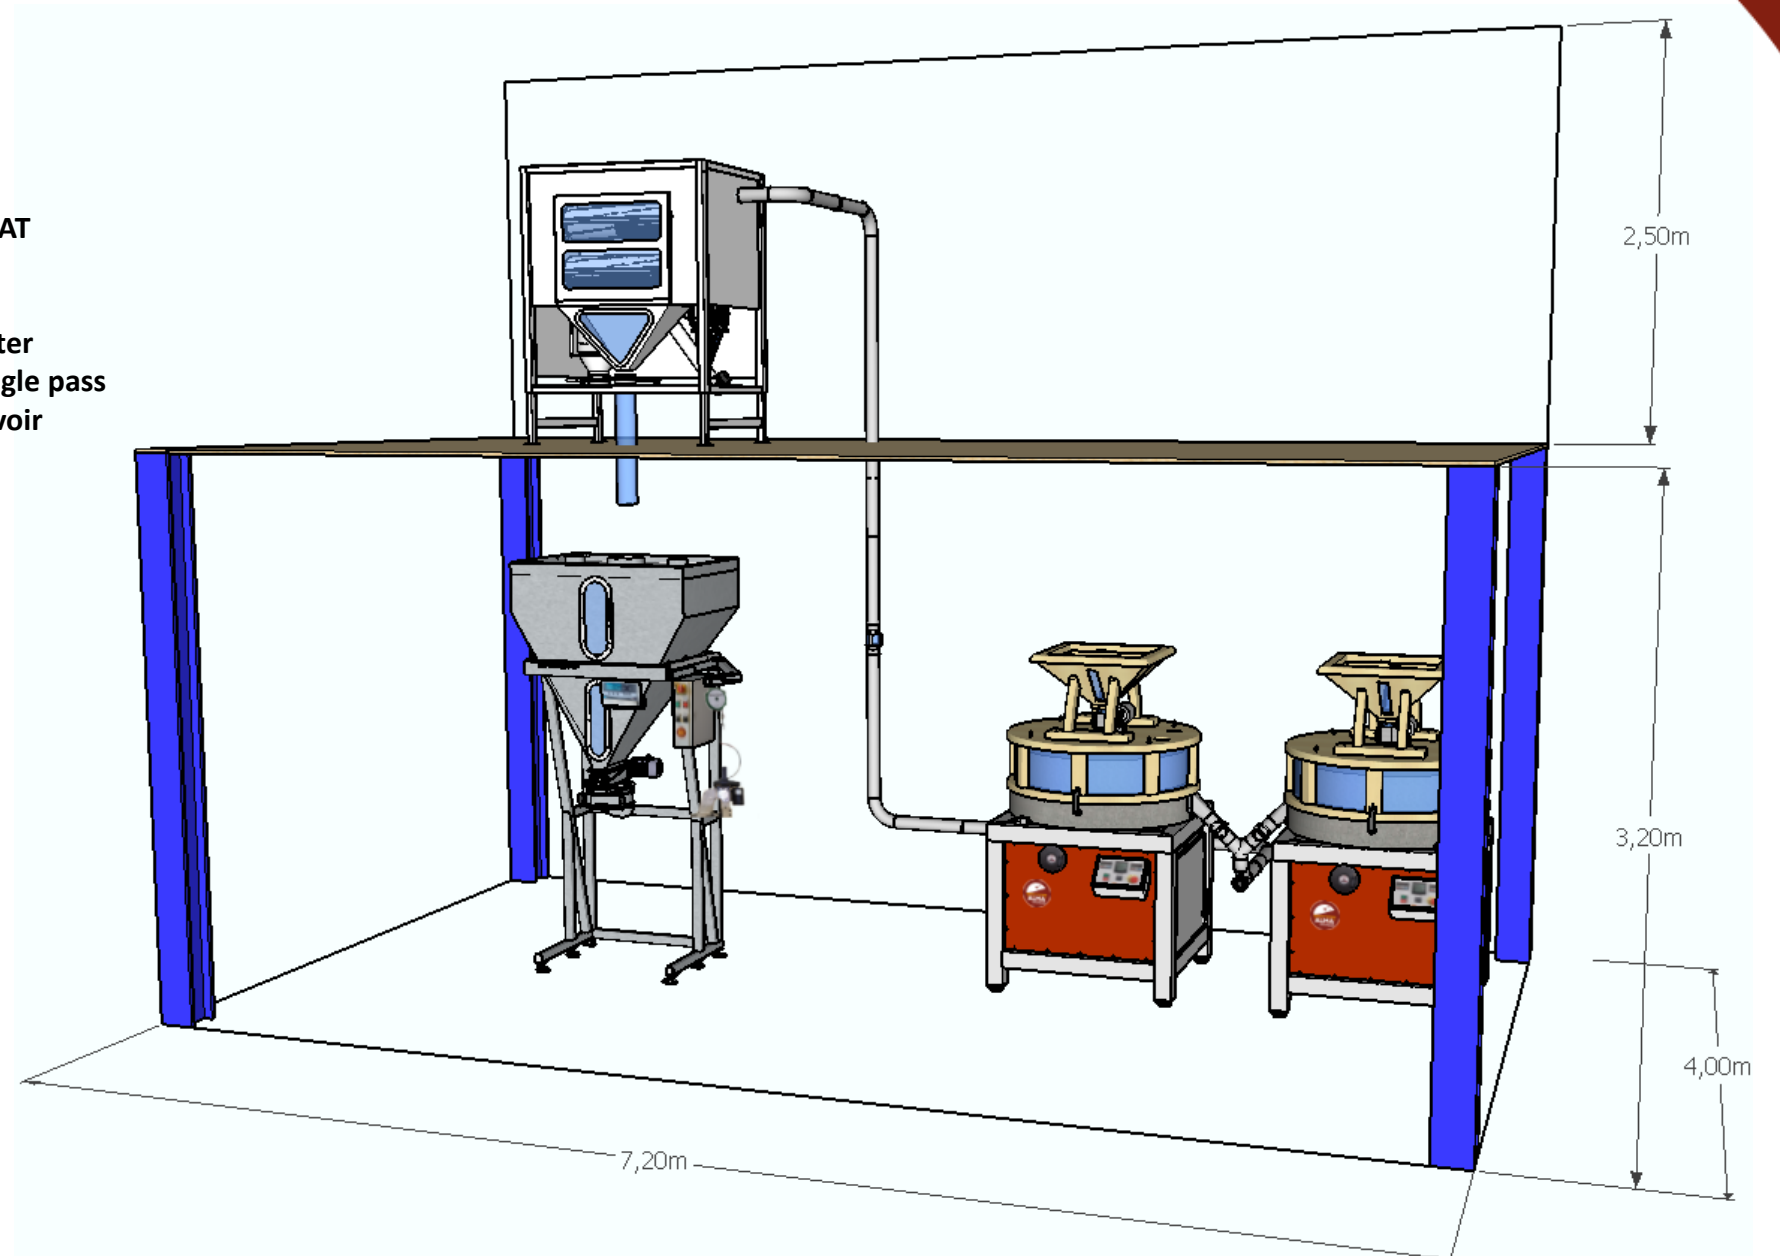

- Investment starting from €99,500 excluding VAT
- Automated: "plug & play" system
- 3-fraction sieving: flour / semolina / bran
- Pneumatic transfer from mill to integrated sifter
- Grinding on natural granite millstones in a single pass
- Capacity: 1000-liter stainless steel flour reservoir
- Ergonomics: Integrated 25kg bagging system

Technical specifications:

- 3 x 16A 400V lines + 2 x 16A 240V lines
- Footprint: 30m² + floor

Average performance with 300µm flour :

- Up to 170 kg/hour
- 84% flour extraction rate
- 34 Wh/kg of ground grain

MICRO-MILLING 2 x PRO100

Installation with sifter on the upper floor: layout
